

FLAT PACK POP UP PARKLET

IMD designed, completed CNC fabrication and installation of a demonstration parklet for the first Berkeley Sunday Streets event in October 2012. The structure is owned by the advocacy group Livable Berkeley and was used by the East Bay Bicycle Coalition at their 40th Anniversary as the centerpiece of the "Streetscape of the Future." Future installations on Shattuck Avenue in North Berkeley will support creation of a permitted parklet program for the City of Berkeley.
